CATALOG
HOUSES-TO-GO

With wheels, traditional proportioning and archetypal form, these little structures are all designed to be portable and can, essentially, be sited anywhere you can park a travel trailer.* They range from about 50 to 130 square feet. Purchase yours ready-made or buy the plans to build it yourself.

COTTAGES

This category is reserved for all of our stationary designs of more than 120 square feet. Most include plans for add-on bedrooms and can accommodate small families comfortably.*

*** Some municipalities have setback requirements, use and/or habitation prohibitions, size restrictions, minimum size prohibitions, and/or other regulations restricting the installation of certain structures or their use for certain functions on some properties. Ask your local building/housing and zoning departments if a Tumbleweed Tiny House is right for you.
With a couch, stainless steel desk, sink and fireplace, a wet bath, two closets and plenty of shelving, the **XS-HOUSE** was designed to accommodate one full time resident comfortably. A small refrigerator below the counter and hot-plate are also included.

The kitchen is really just a kitchenette. It is a simple stainless steel counter with a sink, and surrounded by shelves. Below the sink, there is a small water heater, refrigerator, and a hot plate that is used for cooking.

The **XS-HOUSE** is more easily removed from its wheels than other tiny houses.

You can purchase the plans to build this house on our website [www.tumbleweedhouses.com](http://www.tumbleweedhouses.com), or you can purchase it ready made for $38,997 (prices subject to change).

**DIMENSIONS AND COSTS**

- **Dimensions**: 7' x 10'
- **Total square footage**: 65
- **Road height**: 12' 9"
- **Ceiling height**: 6' 2"
- **Loft height**: 3' 2"
- **Dry weight**: 4,000 lb
- **Estimated material costs**: $16,000
- **Ready made costs**: $38,997
- **Cost of Plans**: $99

*Note: all dimensions are approximate. Prices are subject to change. Costs are estimated.*
The EPU contains a large stainless steel desk, a tiny fireplace, refrigerator, sink, stove-stop, oven, wet bath and plenty of storage. Integral wheels make it easy to move almost anywhere. The 89 square feet listed don’t include the porch sleeping loft. (Shown here with optional gothic window).

You can purchase the plans to build this house on our website www.tumbleweedhouses.com, or you can purchase it ready made for $45,997 (prices subject to change).

The WEEBEE is based on the EPU design with the addition of a Dutch hip roof and fold out bed in the bump-out downstairs. This little house comes on integral wheels.

You can purchase the plans to build this house on our website www.tumbleweedhouses.com, or you can purchase it ready made for $48,997 (prices subject to change).

**DIMENSIONS AND COSTS**

- Dimensions: 8' x 14 1/2'
- Total square footage: 102
- Road height: 13' 5"
- Ceiling height: 6' 3"
- Loft height: 3' 8"
- Dry weight: 4,900 lb
- Estimated material costs: $21,150
- Ready made costs: $48,997
- Cost of Plans: $859

*Note: all dimensions are approximate. Prices are subject to change. Costs are estimated.*
The LUSBY has a full bathroom, a kitchen (sink, stove-top, refrigerator), a mini fireplace, a downstairs bedroom and a loft for additional sleeping or storage. There are also two closets and ample shelving. Because the loft only extends over the bedroom and kitchen area, the rest of the interior remains open to the high cathedral ceiling. In addition to the 117 square feet listed, it also contains more than 50 square feet of loft space.

You can purchase the plans to build this house on our website www.tumbleweedhouses.com, or you can purchase it ready made for $49,997 (prices subject to change).

**DIMENSIONS AND COSTS**

- **Dimensions:** 8’ x 16’
- **Total square footage:** 117
- **Road height:** 13’ 5”
- **Ceiling height:** 6’ 3”
- **Loft height:** 3’ 8”
- **Dry weight:** 5,400 lb
- **Estimated material costs:** $21,250
- **Ready made costs:** $49,997
- **Cost of Plans:** $859

*Note: all dimensions are approximate. Prices are subject to change. Costs are estimated.*
The TARLETON has the same overall footprint as the Lusby. The real difference is that the Tarleton's kitchen is a bit larger and there is no bedroom downstairs. This house is built on wheels, but it can be put on a foundation. The 117 square feet listed do not include 50 feet of loft space.

You can purchase the plans to build this house on our website www.tumbleweedhouses.com, or you can purchase it ready made for $49,997 (prices subject to change).

The WALDEN features the largest kitchen of the Houses-to-Go. The great room has vaulted ceilings which are accented by the pine interior finishing. Stainless steel counters show off the kitchen, and the bathroom has a full shower. The sleeping loft is upstairs and accessible by a ladder built into the cabinets.

You can purchase the plans to build this house on our website www.tumbleweedhouses.com, or you can purchase it ready made for $49,997 (prices subject to change).

The FENCL (pronounced Fen-sel) is a combination of two of our most popular homes: the Tarleton and the Weebee. A cathedral ceiling over the great room makes this little gem feel bigger than you’d think. At 130 square feet, this house only comes on wheels.

You can purchase the plans to build this house on our website www.tumbleweedhouses.com, or you can purchase it ready made for $53,997 (prices subject to change).

The POPOMO is different than our other portable homes. It doesn’t have the pronounced gable roof and, therefore, has no loft. It has all the amenities that the other houses have plus taller ceilings. The large glass wall is intended to face south for excellent solar gain.

You can purchase the plans to build this house on our website www.tumbleweedhouses.com, or you can purchase it ready made for $44,997 (prices subject to change).

**DIMENSIONS AND COSTS**

- Dimensions: 81/2’ x 20’
- Total square footage: 172

The Vardo is not much more than a full-sized bed flanked by a couple of work surfaces over 35 cubic feet of storage space. It can be pulled behind virtually any car or removed from its trailer to rest in most any truck bed. It is pictured on these with an optional fireplace.

You can purchase the plans to build this house on our website www.tumbleweedhouses.com. (prices subject to change).

The **Bodega** and all the small houses that follow make great auxiliary dwellings. There is a full bath and a kitchen, and even a washer/dryer unit below the counter.

The loft is not counted in the square footage, because with so much sloped ceiling, it doesn’t officially count as a habitable room. That said, with seven feet of ceiling height over more than 70 square feet, this heated loft provides plenty of usable space.

The kitchen maximizes spaces and includes a dishwasher, full size range with oven, and built in microwave. The tankless on demand water heater ensures that you never run out of hot water, and tucks away completely out of view. A small fireplace is tucked nicely in the corner of the great room.

If you’d like more, you can opt for a downstairs bedroom addition as shown below.

We do not build this house, however you may purchase the plans ($695) to build it.

---

**Dimensions and Costs**

- **Total square footage:** 261'
- **With add-on:** 356'
- **Height:** 18' 4"
- **Costs of materials 1 BR:** $22,500
- **Costs of materials 2 BR:** $29,500
- **Cost of Plans:** $695

*Note: all dimensions are approximate. Prices are subject to change. Costs are estimated.*
The **LORING** is the bungalow version of the Bodega that was just described. All the amenities remain the same except that a small bump-out has been added in the loft.

Once again, the loft is not counted as square footage, even though there is plenty of usable space up there. If you were to count the loft in the total square feet, this building would measure just over 400 square feet without the add-on bedroom.

The kitchen maximizes spaces and includes a dishwasher, full size range with oven, and built in microwave. The tankless on demand water heater ensures that you never run out of hot water, and tucks away completely out of view. A small fireplace is tucked nicely in the corner of the great room.

If you like more, you can opt for a downstairs bedroom addition as shown below.

We do not build this house, however, you may purchase the plans ($695) to build it.

In this design, the **BODEGA**, described earlier, has been turned sideways and lengthened by about 2 feet for the sake of maintaining good proportions. All of the amenities remain. The **NEW VESICA** is 289 square feet. The optional add-on bedroom (plan shown below) brings the downstairs to 384 square feet.

The kitchen includes a dishwasher, full size range with oven, and built in microwave. The tankless on demand water heater ensures that you never run out of hot water, and tucks away completely out of view. An under counter washer/dryer is also included. A small fireplace is tucked nicely in the corner of the great room.

We do not build this house, however, you may purchase the plans ($695) to build it.

The HARBINGER is the Dutch hip version of the Bodega previously described. In this case a bump out in front provides enough room to create what is essentially an additional bedroom or sitting room downstairs.

If one were to count the loft as square footage, this house actually would measure almost 510 square feet, or 410 square feet with the additional bedroom.

The kitchen maximizes spaces and includes a dishwasher, full size range with oven, and built in microwave. The tankless on demand water heater ensures that you never run out of hot water, and tucks away completely out of view. A small fireplace is tucked nicely in the corner of the great room. A washer/dryer combo in the kitchen makes this home complete.

We do not build this house, however, you may purchase the plans ($695) to build it.

**DIMENSIONS AND COSTS**

- Total square footage: 310’
- With add-on: 404’
- Height: 16’ 7”
- Costs of materials 1 BR: $26,000
- Costs of materials 2 BR: $33,000
- Cost of Plans: $695

*Note: all dimensions are approximate. Prices are subject to change. Costs are estimated.*
The WHIDBEY’s main floor is similar to that of the Enesti, except that a bump-out in front is used to house a downstairs bedroom. A second optional downstairs bedroom is also available. The upstairs square footage in this house is not included because with so much sloped ceiling, it doesn’t officially count as a habitable room. That said, there is plenty of heated space to walk around in up there, that can be used as you see fit. At its peak, the ceiling in the loft is 7’6” tall.

The kitchen maximizes spaces and includes a dishwasher, full size range with oven, and built-in microwave. The tankless on demand water heater ensures that you never run out of hot water, and tucks away completely out of view.

We do not build this house, however, you may purchase the plans ($695) to build it.

**DIMENSIONS AND COSTS**

- **Total square footage:** 461’
- **With add-on:** 557’
- **Height:** 17’ 6”
- **Costs of materials 1 BR:** $43,000
- **Costs of materials 2 BR:** $50,000
- **Cost of Plans:** $695

*Note: all dimensions are approximate. Prices are subject to change. Costs are estimated.*
The SEBASTAROSA is almost the same house as the Enesti, but turned sideways. It contains 1 1/2 baths, two or three bedrooms, a dining nook, ample storage and a full kitchen that includes a washer and dryer beneath the counter. The house pictured here is shown with some custom features. With the third bedroom, the total square footage is 847.

We do not build this house, however, you may purchase the plans ($695) to build it.

**DIMENSIONS AND COSTS**

- Total square footage: 750’
- With add-on: 847’
- Height: 21’
- Costs of materials 1 BR: $49,000
- Costs of materials 2 BR: $56,000
- Cost of Plans: $695

Note: all dimensions are approximate. Prices are subject to change. Costs are estimated.
The ENESTI or NST (not so tiny), contains 1 1/2 baths, two or three bedrooms, a dining nook, ample storage and a full kitchen that includes a washer and dryer beneath the counter.

Shown here is the optional add-on bedroom on the first floor. With the third bedroom, the total square footage is 843.

The kitchen maximizes spaces and includes a dishwasher, full size range with oven, and built in microwave. The tankless on demand water heater ensures that you never run out of hot water, and tucks away completely out of view. A stacking washer and dryer flank the kitchen. A small fireplace is tucked nicely in the corner of the great room.

We do not build this house, however, you may purchase the plans ($695) to build it.

The B-53 is another of our “not-so-tiny” houses. It’s the biggest house we offer at this time. It’s essentially a bungalow style version of the Enesti. It contains 1 1/2 baths, two or three bedrooms, a dining nook, ample storage and a full kitchen that includes a washer and dryer beneath the counter.

The house pictured here is shown with some custom features. With the third bedroom, the total square footage is 864.

The kitchen maximizes spaces and includes a dishwasher, full size range with oven, and built in microwave. The tankless on demand water heater ensures that you never run out of hot water, and tucks away completely out of view. A stacking washer and dryer flank the kitchen. A small fireplace is tucked nicely in the corner of the great room.

We do not build this house, however, you may purchase the plans ($695) to build it.

The Z-GLASS is similar to the Popomo but larger. It measures 370 square feet, almost three times bigger than its smaller cousin. Because of its size, the house is not designed as a portable structure, but rather as a home affixed to a permanent foundation. Still, at 14’ wide, it can be trucked down the road. The model shown here has hot rolled steel siding.

We do not build this house, however, you may purchase the plans ($595) to build it.

### Dimensions and Costs

Discover 22 brilliant small home plans you can build, created by America’s leading designer of the Small House Movement.
If you dream of a tiny home, but aren’t sure where to start on your journey towards building your own, then join us at a Tumbleweed Tiny House Workshop, where you will gain knowledge you will need to build and design your very own tiny home. These workshops, created by Jay Shafer, founder of Tumbleweed Tiny House Company and expert in tiny house building and design, will revolutionize the way you think of space.

Our two day Tiny House Workshop will teach you insightful and extensive information that you will need to build and create your very own tiny house; from picking the proper trailer, to selecting the materials you need, to helping you choose the right tools.

The Tiny House Workshop is where you will learn all the detailed information on tiny home building that you can’t learn anywhere else. You’ll meet many other people just like you - concerned about the environment and the way we live.

BY THE END of your two day session you will have gained priceless knowledge and tools that you can take with you and use to design and build your very own tiny home for your family.

FOR A COMPLETE LIST OF UPCOMING WORKSHOPS: www.tumbleweedhouses.com/workshops
